

Lewis Berkeley

Lewis Berkeley's aim is to provide technical excellence in the delivery of our service. We pride ourselves on the commercial nature of our advice and pro-active approach to our clients' needs and objectives. We aim to tailor our service to the individual requirements of each of our clients.

Lewis Berkeley is committed to providing the highest level of customer service which forms the basis of our corporate values of reliability, competence, experience and integrity.

Building Control

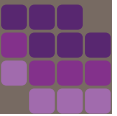

Lewis Berkeley are proud to announce that they have been successful in their application to become one of the select group of Approved Inspectors. Lewis Berkeley's team of qualified surveyors have extensive backgrounds in building control gained in the public and private sectors and will work with your design and construction teams striving for effective solutions to today's construction issues.

As a corporate approved inspector Lewis Berkeley will provide a fast and efficient alternative to the local authority building control system. This includes the entire process from pre-submission appraisal where we can offer design advice and cost saving opportunities, design and plan checking, fire brigade liaison (where appropriate) and comprehensive site inspections tailored to the needs of our clients. integrity.

We are sure you will find the contents of our website will provide you with the relevant information you require. If you do require further assistance please do contact us.

Building Consultancy

Lewis Berkeley's provides building surveying and project management advice across all sectors of the property industry, employing specialists to ensure the highest standard of advice is given in each area. Through our experienced team of qualified surveyors we are able to provide a customer focused service with fast, reliable and effective solutions.

Our expertise covers traditional building consultancy services such as condition surveys, party walls, fit-out and dilapidations, through to specialist construction project management, project monitoring and services across the full lifecycle of the property.
